PROFESSIONAL SUMMARY

Network Engineer with hands-on experience in data center operations, routing protocols, and network automation. Skilled in building scalable and resilient network infrastructures using Python, Ansible, and multi-vendor technologies. Adept at diagnosing complex network issues, optimizing performance, and deploying automation-driven solutions.

TECHNICAL SKILLS

Networking: TCP/IP, VLANs, DNS, DHCP, NAT, VPN, OSPF, EIGRP, BGP, MPLS, GRE, VRF.

Network Automation & DevOps: Python, Ansible, Bash, Git/GitHub, Netmiko, NAPALM

Monitoring & Troubleshooting: Wireshark, SolarWinds, PRTG, QRadar (SIEM), tcpdump, Nmap.

Operating Systems: Linux (Ubuntu, CentOS), Windows.

Cloud & Virtualization: AWS (EC2, VPC, IAM), Microsoft Azure, VMware Workstation, VirtualBox

Infrastructure & Security: Firewalls (Cisco ASA, Palo Alto), Active Directory, VPN Tunnels, ACLs

Programming & Scripting: Bash, SQL, HTML, CSS, JavaScript

CERTIFICATIONS

Network Engineering and Security Certifications:

- Cisco Certified Network Professional Enterprise (CCNP)
- Palo Alto Certified Network Security Engineer
- Cisco Certified Network Associate Routing and Switching (CCNA)
- CompTIA Security+
- ISC² Certified in Cybersecurity
- Linux 101 (TCM Security)

Cloud Certifications:

- Microsoft Azure Administrator
- Azure Fundamentals
- AWS Solution Architect Associate (In Progress)
- AWS Cloud Practitioner

EXPERIENCE

Datacenter Operations Tech

May 2025 to Present

Amazon Web Services

- Perform maintenance, installation, and decommissioning of servers and network equipment, ensuring continuous operation of large-scale data center infrastructure.
- Conduct diagnostics and root cause analysis using Linux CLI tools and vendor utilities, minimizing downtime and maintaining SLA compliance.
- Collaborate with remote engineering teams to resolve complex connectivity issues and optimize server/network performance across multi-region environments.
- Document incidents and corrective actions through internal ticketing systems, improving resolution time and operational consistency by 25%.

IT Network Engineer

June 2024 to Apr 2025

Motrex LLC (Stryten Energy)

- Designed, deployed, and maintained enterprise LAN/WAN infrastructure supporting 40–50 end users across multiple plant sites.
- Automated repetitive network configuration tasks with Python and Ansible, reducing manual operations by 20% and improving reliability.

- Monitored and optimized network performance using SolarWinds and Wireshark, achieving a 30% increase in availability and stability.
- Troubleshoot complex connectivity and routing issues across VLANs and VPNs, reducing user-reported downtime by 15%.
- Enhanced network documentation and implemented change control procedures to improve configuration accuracy and scalability.

Information Security Analyst Intern
Millennium Management LLC.

June 2023 to Aug 2023

- Developed an internal automation tool to generate reports for current and future Common Vulnerabilities and Exposures (CVEs).
- Investigated email-based threats, leveraging SIEM (QRadar) and packet analysis tools to identify phishing, malware, and malicious activities.
- Partnered with network and security teams to strengthen incident response and implement mitigations for identified security gaps.

Network Support Engineer
Cyberspace Network Limited

Feb 2018 to Dec 2021

- Supported deployment and configuration of enterprise-grade Cisco routers, switches, and firewalls for ISP-level networks.
- Maintained 95% network uptime by troubleshooting Layer 1–3 issues within SLA windows and escalating critical faults effectively.
- Implemented network monitoring and alerting systems (PRTG, SolarWinds), improving visibility and reducing downtime by 30%.
- Performed KPI-based analysis and provided actionable insights for network optimization and capacity planning.

EDUCATION

Georgia Southern University – Master’s degree, Information Technology, 4.0 GPA

Landmark University – Bachelor of Electrical Engineering, 3.5 GPA

PROJECTS

Enterprise Network Design and Simulation Lab

Feb 2024 to Present

- Designed and managed a home lab environment using VMware Workstation Pro and EVE-NG to simulate enterprise-grade networks.
- Automated network configurations using Python and Ansible, reducing manual configurations.
- Exploring AI-driven solutions for predictive network monitoring and anomaly detection.

Developed a browser extension to detect keyloggers.

Jan 2023 to Mar 2024

- Master’s Thesis capstone project, Tools used: Python, HTML, CSS, Linux (ubuntu), VMware.

Comparative analysis of vulnerability scanners for effective vulnerability management.

- Tools used: Open VAS, Ubuntu, Nessus Essentials, metasploitable2.

Dec 2022

Deployed a DHCP server for a Red Team Blue Team Lab

Jan 2022 to May 2022

- Tools used: VMware, windows server 2012.

**ACHIEVEMENTS
& AWARDS**

Information Technology Award For Academic Achievement Graduate student Fall 2023

3rd place Graduate for the Georgia Centers of Innovation Top Eagle Award.

**LEADERSHIP/
VOLUNTEER**

Member, Institute of Electrical and Electronics Engineers (IEEE)

Jan 2023 - Present

Member, International Information System Security Certification Consortium (ISC2)

Jan 2023 - Present
